

Turn Attendance into Involvement  
 Turn Participation into Assessment  
 Turn Potential into Success

## eBeam Respond

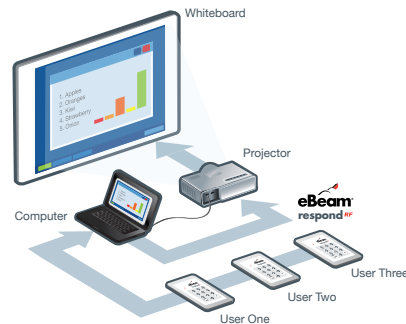

eBeam Respond transforms standard PowerPoint presentations into powerful two-way communication tools that captivates the attention of both students and colleagues alike. The light-weight keypads allow everyone in the room to respond to every question, so you know who is following along and who is falling behind. Response reports can be specified in a variety of ways, so you can assess individual successes or observe group dynamics.

Combined with eBeam Projection, eBeam Respond allows presenters and teachers to run their entire session from the front of the room so they aren't trapped behind their computers running the PowerPoint show. eBeam Interact even offers a special PowerPoint-integrated toolbar that can be used to annotate slides during the presentation.

### Highlights

- At anytime during your session, instantly see how everyone is progressing
- The Report Wizard organizes participant response data at the individual, group, or division level
- Use Speed Scoring to reward fast answers
- Automatically generate PowerPoint presentations from existing MS Word or XML documents
- Create multimedia test questions that include images, sounds, and even video
- Encourage group discussion and free association by adding questions on the fly

### Features

- Ultra-Portable—eBeam Respond keypads and receiver fit into a light-weight, custom carrying case
- Fully-integrated into Microsoft PowerPoint
- Works seamlessly with eBeam Projection

### Benefits

- Increases audience attention and encourages involvement
- Allows everyone to participate and answer questions without putting anyone in the spotlight
- Delivers immediate feedback to instructors so they can confidently move on
